## New servo-electric bending machine

### Advantages:

#### Efficiency

Fully automatic loading and unloading operation suitable for manufacturing medium to long series

#### Quality

Excellent bending quality as required by e.g. design products

#### Cost effectiveness

Low overall operation cost due to low energy consumption (-64%), low oil maintenance cost, very fast operation

#### Environmental protection

Less CO2 thanks to the lower energy consumption

#### Technical datas:

- Max bending length - 2,250 mm
- Min length between bends - 350 mm
- Min width between bends - 160 mm
- Bending force - 32 tons
